MALIK SAAD MUNAF

Network Engineer | Systems Administrator

+92 312 0725809 | saadimalik776@gmail.com | Lahore, Pakistan | linkedin.com/in/-maliksaad

PROFESSIONAL SUMMARY

Network Engineer and Computer Science graduate with hands-on experience designing and securing enterprise and cloud network infrastructure. Skilled in network architecture (**Hub-and-Spoke** topology, **Azure Firewall**, VNet, NSGs, **P2S** VPN), system administration in **Linux**-based environments, and troubleshooting routing and connectivity issues. Builds on this foundation with practical exposure to Azure cloud infrastructure, **Infrastructure as Code** (**Terraform**, **Bicep**), and **CI/CD** automation, giving a broad view of how networking underpins modern cloud deployments. Azure Fundamentals (AZ-900) and Azure Administrator (AZ-104) certified, with CCNA (Cisco Certified Network Associate) training completed at Corvit Systems.

CORE SKILLS

Networking: VNet, Subnets, NSG, Service Endpoints, Private Endpoints, Azure Firewall, Load Balancer, Application Gateway, Traffic Manager, Azure Front Door, P2S VPN, Hub-and-Spoke Architecture

Networking Tools: Cisco Packet Tracer, Network Configuration & Troubleshooting

Operating Systems: Linux

Cloud Platform: Microsoft Azure (Portal, CLI, ARM)

Compute & Containers: Virtual Machines (VMs), VM Scale Sets (VMSS), Azure App Service, Azure Functions, AKS, Docker, Azure Container Registry (ACR)

Storage & Databases: Azure Blob Storage, Azure SQL Database

IaC & Automation: Terraform, Azure Bicep

CI/CD & DevOps: Azure DevOps, Azure Repos, YAML Pipelines

Version Control: Git, GitHub, Azure Repos

Soft Skills: Problem-Solving, Adaptability, Teamwork, Communication

Languages: Urdu (Native), English (Professional)

PROFESSIONAL EXPERIENCE

Systems Limited *Oct 2025 – Apr 2026*

Cloud / DevOps Intern

- Implemented secure cloud network architecture using a **Hub-and-Spoke** topology with **Azure Firewall** for centralized traffic management.
- Configured **Point-to-Site (P2S) VPN** for secure remote access to Azure virtual networks.
- Deployed secure 3-tier applications using **Azure App Service**, **Azure SQL Database**, and **Private Endpoints** with **VNet Integration**.
- Performed system administration, scripting, and automation tasks in **Linux**-based environments.
- Provisioned and managed Azure cloud infrastructure using **Azure Portal**, **Bicep**, and **Terraform** (Infrastructure as Code), covering networking, compute, and storage resources.
- Designed and automated **CI/CD pipelines** in **Azure DevOps**, enabling end-to-end deployment from **Azure Repos** to production environments.
- Built and managed containerized applications using **Docker**, including image versioning and deployment through **Azure Container Registry (ACR)**.

NAVTTC *Mar 2024 – Jun 2024*

Network Administrator Trainee

- Built foundational expertise in networking concepts and system administration.
- Configured and managed network devices, monitoring performance and ensuring connectivity stability.
- Troubleshot routing, connectivity, and basic security issues across network environments.

PROJECTS

Azure Cloud & Networking Projects *Cloud/DevOps*

- Designed and deployed a **Hub-and-Spoke** network architecture on Azure with **Azure Firewall** for centralized traffic inspection, implemented using Terraform and Bicep.
- Configured **Point-to-Site (P2S) VPN** for secure, encrypted remote connectivity to Azure virtual networks.
- Deployed a production-grade 3-tier application using **Azure App Service**, **Azure SQL Database**, **Private Endpoints**, and **VNet Integration** to ensure secure communication.

DiabetoVision *Final Year Project*

- Developed a deep learning-based diabetic retinopathy detection system using **ResNet50V2** and **DenseNet169** (TensorFlow/Keras).
- Implemented image preprocessing and augmentation using **OpenCV** for medical image enhancement.
- Built an automated classification system for medical report generation with a user-friendly interface.

LEADERSHIP & ACTIVITIES

IEEE Riphah University FC Chapter *2024 – 2026*
Vice Chairperson (2024), Chairperson (2025)

- Led and coordinated technical events, workshops, and international-level conferences.
- Organized **IEEE Summer School** 2023 and 2024, and **INMIC**, in collaboration with industry professionals.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) — Microsoft
- Microsoft Azure Administrator (AZ-104) — Microsoft
- CCNA (Cisco Certified Network Associate) — Corvit Systems

EDUCATION

Riphah International University *2021 – 2025*
Bachelor of Science in Computer Science

Superior College, Bhera *2019 – 2021*
FSc ICS (Pre-Engineering)

Cadet College Rawalpindi *2017 – 2019*
SSC (Matriculation)
